Mission: Lifeline Regional Report Pre-Hospital ECG Measure Drill-Down Instructions

STEP 1: Perform a data download of the required elements

- Log in to Action Registry
- Select Data on bar at the top of the page

	Administration Dashboard	Must pull raw data to monitor this performance metric	www.ncdr.com ' ality Improvement. Quantified." 2013q3 (list Published) M
--	--------------------------	---	--

- Select Data Collection Tool (v2) on the menu on the left side of page
- Select NCDR Maintenance on menu on the left
- Select Data Extract tab at the top

- Select Discharge date
- Select Full Data Extract (very last option)
- > Highlight the fields you wish to download (left click and control at the same time)

Hospital-Level Process Measures (pages 7-8)					
Variable	Definition	Indusion/Exclusion Criteria			
Pre-hospital ECG (Arrival by EMS)	Transferred from Outside Facility – No Means of Transport to First Facility – Ambulance % Pre-hospital ECG (current quarter)	All STEMI patients, excluding patients not arriving via EMS includes direct presenters arriving via Ambulance only; Mobile ICU and Air transport are not included.			

- o 3100 Means of Transport to First Facility
- o 3110 Transferred from Outside Facility
- \circ 4010 First ECG Obtained
- o 4030 STEMI or STEMI Equivalent
- Click on Download Extract

	Select a Download Format	Microsoft Excel	~	
		Note:	asthame, FirstName, Ni	iName, OtherID, Ar

You should now have an Excel Spreadsheet with requested fields.

STEP 2: Eliminate Cases Not in Measure Population

Hospital-Level Process Measures (pages 7-8)					
Variable	Definition	Inclusion/Exclusion Criteria			
Pre-hospital ECG (Arrival by EMS)	Transferred from Outside Facility – No Means of Transport to First Facility – Ambutance % Pre-hospital ECG (current quarter)	All STEMI patients, excluding patients not arriving via EMS Includes direct presenters arriving via Ambulance only; Mobile ICU and Air transport are not included.			

To narrow your spreadsheet to the cases included in the Pre-Hospital ECG measure, incorporate the measure inclusion and exclusion criteria by executing the following steps:

Steps	CORRESPONDING PRE-HOSPITAL ECG DEFINITION OR
	INCLUSION/EXCLUSION CRITERIA, FROM ML REPORT
	GLOSSARY
Highlight all entries in which STEMI or STEMI	Inclusion: All STEMI patients
Equivalent = No, and delete	
Highlight all entries in which Means of Transport	Definition: Means of Transport to First Facility =
to First Facility is not Ambulance, and delete	Ambulance
Highlight all entries in which Transferred from	Definition: Transferred from outside facility = No
Outside Facility=Yes, and delete	

Your spreadsheet now shows all cases that enter into the Pre-Hospital ECG measure. To view your Pre-Hospital ECG fallouts:

- Sort spreadsheet by First ECG Obtained.
- Values of "After 1st hosp. arrival" are fallouts.
